Vitamin A, Minimum	100,000 IU/lb
Vitamin D, Minimum	20,000 IU/lb
Vitamin E, Minimum	350 IU/lb

INGREDIENTS:

ProBiotin (Yeast Culture on a fermented media of wheat, oats, barley malt and flax) , Distillers Dried Grains with Solubles, Ground Flax, Salt, Diatomaceous Earth, Monocalcium Phosphate, Calcium Sulfate, Magnesium Oxide, Potassium Chloride, Proteinated Complexes of Zinc, Manganese and Copper, Zinc Sulfate, Manganese Sulfate, Copper Sulfate, Cobalt Carbonate, Sodium Selenite, Ethylene-diamine Dihydriodine, Aspergillus Oryzae Extract, Vitamin E Supplement, Mineral Oil, Vitamin D3 Supplement, Vitamin A Acetate (stability improved). d-BIOTIN.

Net wt. 50 lbs (22.7 kg) pan

Look for **EQUILIX™50** along with its companion product, **(EQUIPRIDE™)** which comes in a meal form for top-dress supplementation.

EQUILIX™50's Complex Carbohydrates Versus the Simple Sugars of Molasses Are Nutritionally Superior and Stay Solid In Summer Heat Eliminating the Sticky Smearing Which Can Trap Dirt and Attract Flies.

(US Patent #5,260,089 which deals with new, advanced alternatives to molasses licks applies to this product.)

SweetPro™ also has specialty supplements for Beef and Dairy Cattle, Deer & Elk, and Sheep.

For more information contact your local **SweetPro™** Feeds dealer.

EQUILIX™50

A New Horse Lick With Unique "Two-Part" Nutritional Benefits

Part "One"

Improves Appearance, Performance and Immune Function Through Better Feed Digestion

Part "Two"

Meters Out Buffered Benefits to Combat Gastric Distress

SweetPro™ FEEDS

PROUDLY INTRODUCES

EQUILIX™ 50

A NEW NON-MOLASSES LICK SUPPLEMENT WHICH COMBINES A COMPLETE VITAMIN AND MINERAL PACKAGE WITH A BUFFERED DIGESTIVE AIDE TO HELP SETTLE GASTRIC DISTRESS.

It's a Unique "One-Two" Nutritional Punch to Meet the Demands of Today's Performance and Pleasure Horses.

1

EQUILIX™ 50 first blends vitamins, organic complexed trace minerals, stabilized milled flax and distillers grains with an acid fighting buffer blend of calcium and magnesium.

Next the blend is congealed into a lick without using molasses. Instead, we focus on condensed distillers solubles and **ProBiotin**.

ProBiotin is a proprietary blend additive consisting of yeast culture, prebiotic oligosaccharides, enzymes, and protein isolates.

The **Yeast** in ProBiotin, cultured on a media of wheat, oats, barley malt and flax, is rich in biotin and other nutrients to aid digestion.

The **Oligosaccharides**, often called "prebiotics," because they feed the beneficial probiotic bacteria, are a key part of the ProBiotin additive. These prebiotics help maintain good digestive tract health.

Enzymes, the catalysts of digestion are included in a fibrinolytic, amylolytic & proteolytic array to assist fiber, protein and mineral utilization.

2

EQUILIX™ 50 contains **Flax** to promote healthy joints, clear eyes and shiny coats.

Flax helps in many ways. Oil from flax is dense energy which is high in Omega 3 fatty acid content. Omega 3 is an essential fatty acid often missing in modern diets. Flax is also among the richest sources of lignans, which help improve immune function.

3

EQUILIX™ 50 features **Organic Complexed Minerals**. Zinc, copper and manganese are complexed, or bound to protein instead of other minerals, assuring high bioavailability.

4

EQUILIX™ 50 Buffer Dispenser!

To combat gastric ulcers, equine practioners recommend small non-starch meals throughout the day. This helps buffer acids that can erode the upper stomach wall lining. And that's exactly what **EQUILIX™ 50** helps deal with. It meters out small, prefermented, non-starch meals, bolstered with antacid calcium and magnesium, thus minimizing gastric distress.

5

Now with **EQUILIX™ 50** you get a **feed efficiency boost** so the cost of maintaining your horse in top condition can be reduced.

Look for up to **25% improvement** in forage feed efficiency with **SweetPro™'s**

EQUILIX™ 50
